CDW Client Systems

Build a Complete, Business-Ready Setup

CDW Peripheral Solutions Overview

Equip Employees for Success From the Start

In today's workplace, the right computer is only part of the equation. The right monitor, dock, keyboard, mouse, webcam and headset can help employees work more comfortably, collaborate more effectively and get productive faster. CDW helps organizations build complete setups with trusted brands, expert guidance and enterprise-ready support that makes it easier to buy with confidence.

Why Peripherals Matter

Productivity From Day One

The right setup helps reduce friction, simplify daily tasks and support faster ramp-up for new and existing employees.

Collaboration Readiness

Better webcams and headsets help employees communicate clearly and show up professionally in hybrid and remote meetings.

Comfort That Supports Better Work

Monitors, input devices and desk setups all play a role in reducing fatigue and creating a better day-to-day experience.

More Value From Every Device

When a full refresh isn't practical, accessories can improve the user experience and extend the value of existing endpoints.

CORE CATEGORIES FOR A COMPLETE SETUP

Displays and Monitors

Support multitasking, visibility and a more comfortable work experience.

Docks

Simplify connectivity and create a cleaner, more consistent workspace. As newer devices evolve, including some AI PCs with higher wattage needs, dock compatibility and power delivery matter more than ever.

Keyboards, Mice and Webcams

Everyday tools that shape comfort, control and collaboration.

Headsets

Essential for clearer meetings, better focus and more professional hybrid work experiences.

Choose the Right Setup for the Way Your Users Work

Different roles need different setups. CDW helps customers simplify decisions with practical recommendations by user type, along with guidance on compatibility, standardization and rollout planning.

Persona-Based Setup Examples

Hybrid Worker

Built for flexibility across home and office with a monitor, dock, keyboard, mouse, webcam and headset.

Power User

Supports multitasking and performance-heavy workflows with more screen space, stronger dock performance and comfort-focused peripherals.

Shared Workspace

Prioritizes consistency, durability and easy replacement for hoteling, kiosks, call centers and shared stations.

Education

Supports mobility, durability and high-volume deployment with items such as headsets, styluses, keyboard cases and protective accessories.

Healthcare

Supports cleanability, reliability and telehealth needs with cleanable input devices, headsets, webcams and higher-grade displays where needed.

WHAT TO CONSIDER

Compatibility Matters

Ports, USB-C or Thunderbolt support, power delivery and display requirements can all affect the right dock and accessory choices. CDW can help you validate docks, displays, cables and power needs.

Standardization Simplifies Support

Choosing consistent setups across users can help reduce complexity, improve the user experience and make replacements easier.

Buying for Today and Tomorrow

Newer options can improve comfort, collaboration and connectivity. CDW can support phased rollouts and buy-and-hold options that help ensure availability for future hires, replacements or expansion.

Why Buy Through CDW

Expert Guidance

Get help selecting peripherals that fit your devices, users and environment.

Trusted Brands

Find business-ready options from brands such as Dell, HP, Lenovo, Logitech and Samsung.

Scale and Support

CDW can help with standardization, rollout planning and larger purchases across your organization.
